Export-Import Bank of India

Date: July 01, 2019

**INVITATION FOR PREQUALIFICATION OF
CONSULTANTS FOR PREPARATION OF DETAILED PROJECT REPORT (DPR) FOR
GOVERNMENT OF INDIA LINE OF CREDIT (LOC) PROJECTS**

The Export-Import Bank of India [hereafter Exim Bank, or the Bank], on behalf of the Government of India (GOI), extends from time-to-time, concessional credit facilities under the Indian Development and Economic Assistance Scheme (IDEAS) to overseas governments/ their nominated agencies in developing countries for financing projects involving procurement of goods, civil works, consultancy and non-consultancy services to be contracted to Indian entities.

These Lines of Credit (LOCs) are governed by the Guidelines issued by the GOI from time-to-time. As per the extant guidelines issued vide letter No. 21/3/2015-IDEAS dated December 7, 2015, the Bank is required to carry out a prequalification exercise and provide a list of prequalified bidders to the Borrower for invitation of bids for specific contract packages under the project(s) financed by the LOCs.

In pursuance to the above, the Bank invites Applications from eligible Indian Consultants for prequalification for (a) preparation of the Detailed Project Report (DPR) and (b) Project Management Consultant (PMC) services for Water supply and sewerage system project in 34 Islands in Maldives under a Line of Credit extended to the Government of the Maldives.

An upfront and non-refundable Processing Fee of INR 25,000 plus applicable GST (presently 18%) is payable through NEFT transfer as per details given below:

Part I: Scope of Consultancy Services

The Export-Import Bank of India (Exim Bank or the Bank), on behalf of the Government of India (GOI), has approved financing of a project out of a Line of Credit extended to the Government of Maldives for various developmental projects. A part of the LOC shall be utilized for Water supply and sewerage system project in 34 Islands in Maldives for which Exim Bank now seeks applications for prequalification from eligible Indian Consultants for (a) preparation of the Detailed Project Report (DPR) and (b) Project Management Consultant (PMC) services. Refer Part II ITA 4 for eligibility provisions.

A) Background and Major Components of the Project

The project for water supply and sewerage system in 34 Islands in Maldives would be implemented under Ministry of National Planning & Infrastructure, Government of Maldives. The objective of the project is to improve the water supply and sewerage facilities in these islands by installing a proper water supply distribution network thereby ensuring protection of groundwater aquifer and sustainable water resource management, and hence improving the health and wellbeing of the people. The Project will directly benefit a population of 29.25% by improving the living standard through provision of safe drinking water and sewerage facilities in these 34 islands.

I. Water Supply Systems-

Objectives: There are no surface water sources for potable use in Maldives. The available source is groundwater which is thin lens between 1 meter and 1.5 meter below the surface and another is rainwater. Ground water is particularly prone to pollution from human activities (improper sewerage and waste disposal) and salt water inundation by the sea. Changing environmental conditions and urbanization of the islands does not make rainwater dependable throughout the year.

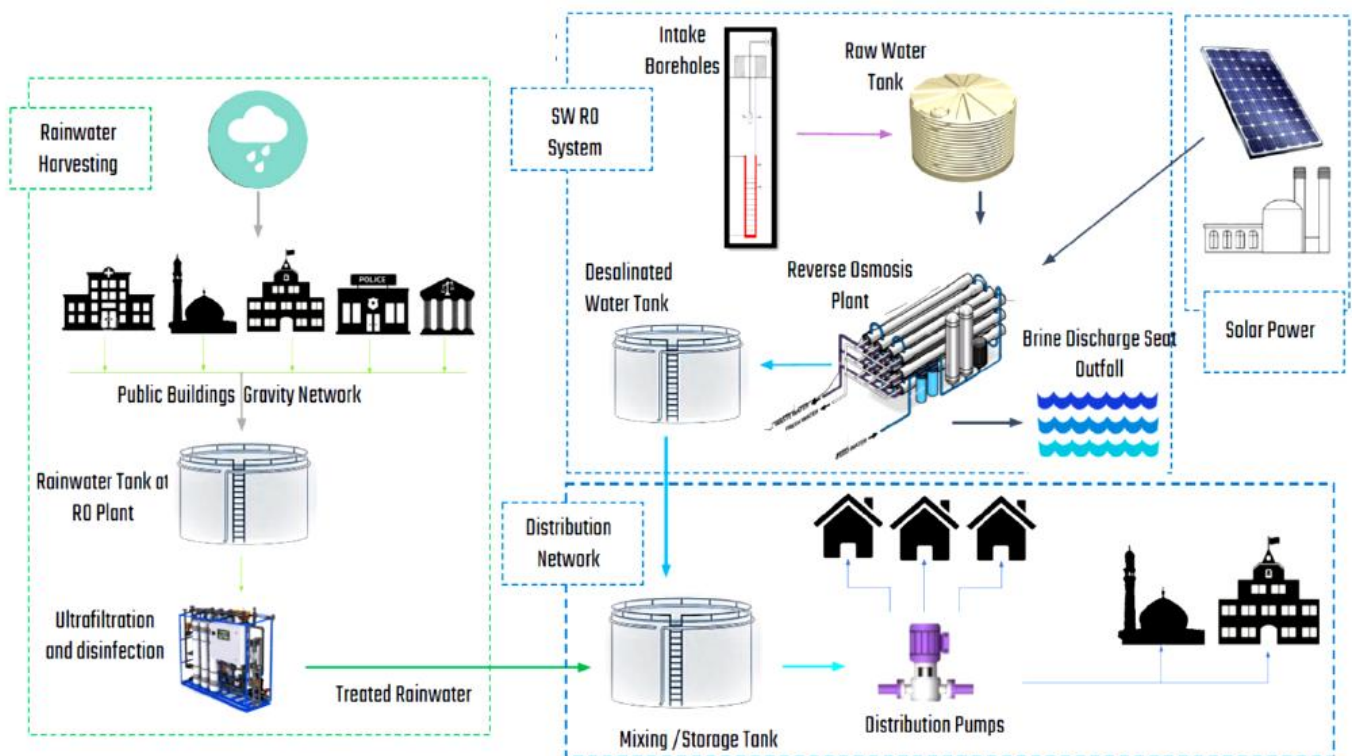

In view of the same, desalinated water, via reverse osmosis from seawater is utilized. Among all the inhabited islands, only 34 islands have full water supply network from desalination, piping network and safe disposal of brine out of the shorelines of the islands. The water supply project implementation is ongoing in 17 islands. 137 islands, covering 96,293 or 48.87% of the Atoll population still does not have access to piped water network facilities. Accordingly, there is a need for immediate action for safe water supply services in these islands. This project aims at implementing Water supply project in 32 islands of Maldives.

Components: Key components of the system would be as follows:

- **Rainwater Collection:** Rainwater will be collected from public building roof catchments via a gravity network. Thereafter, collected rainwater would fall into a sump located at Water Treatment Plant (WTP) Facility or at a specific location on the island. Rainwater would be pumped into Raw Water Storage Tank by an automatic operation of submersible pumps at collection sump.

- **Rainwater Treatment:** Rainwater will undergo ultra-filtration and Ultraviolet (UV)/Chlorine disinfection treatment at WTP facility. Treated rainwater is then transferred into mixing tank.
- **Sea Water Intake:** Water intake bore wells would be constructed at WTP Plot Area. Seawater would be pumped, by submersible pumps placed inside the well or dry mounted pumps placed near the top of borehole, into feed water tanks.
- **Desalination System:** Feed water would be pumped through multimedia filters; this filtered water is pretreatment water. After pretreatment, the high pressure pumps will then pump the raw water through Reverse osmosis (RO) membranes. The permeate (treated water) at the outlet will go through disinfection and then into mixing tanks. From mixing tanks, water would flow to storage tanks. Brine Rejected from the RO process is transferred to brine tank which will be pumped to sea via brine outfall.
- **Distribution Network:** The storage tanks will be connected to distribution pumps which would supply the water to entire network in the islands. Chlorine dosing would be carried into the distribution network. Each household would be provided with a metered water supply connection.
- **Solar power:** WTP and administration building roof area will have photovoltaic modules for generation of solar power. The electricity will be used either directly to run the WTP or fed into island grid to supplement the energy demand of the RO plants.

A diagrammatic representation is as below:

II. Sewerage Systems-

Objectives: Improper disposal of sewage and poorly constructed septic tanks, make the shallow ground water lens susceptible to pollution and threatens the human health of the island communities in Maldives. Among the inhabited islands, only 66 islands have complete proper effluent collection from onsite household sewage collection tanks and it is disposed off untreated in near-shore marine outfalls. 87 islands, covering 47,798 or 24.26% of the Atoll population do not have proper sewerage facilities.

Accordingly, there is need for immediate action to improve sewerage facilities in the islands for protection of public health and environment. This project aims at implementing Sewerage system in 15 islands of Maldives.

Components: Key components of the system would be as follows:

- **Gravity Catchments:** Each Household will be provided with a catch pit and a lateral connection which will discharge the sewage into sewer mains. The lateral pipelines would be 110mm Unplasticized Polyvinyl Chloride (UPVC) pipes and sewer mains network will use 160mm UPVC pipes. Cleanouts or maintenance shafts would be placed at the starting point of the gravity line. Manholes would be placed at junctions or/and at every 60m in the main line.
- **Lift Stations:** The Sewer mains will discharge sewage into lift Stations (LS). Lift Stations will be fitted with two submersible pumps. Based on the sewage levels within the lift station sump, the pumps will operate automatically to discharge the sewer into pressure network.
- **Pressure Network, pump station and outfall:** Sewage Pumped into pressure network from lift stations located at each catchment will be discharged into outfall pump station or Sewage treatment Plant (STP). If there is no STP, the sewage will be directly discharged into the sea via sea outfall. The discharge will be directed into sea, away from the reef edge and into a minimum depth of 6 m.

A diagrammatic representation is as below:

Location: Maldives has 26 naturally occurring atolls which are divided into 20 administrative ones:

1. Haa Alifu Atoll – (Thiladhunmathee Uthuruburi)
2. Haa Dhaalu Atoll – (Thiladhunmathee Dhekunuburi)

B] Scope of Work

I) Description of Scope for Preparation of Detailed Project Report (DPR)

The scope for preparation of Detailed Project Report (DPR) shall broadly include but not limited to the following:

The Consultant will be responsible for preparation of the DPR for Water supply and sewerage system project in 34 Islands in Maldives.

The DPR should cover the following areas:

- The social, economic and technical rationale of the proposed project;
- A detailed cost break-up along with detailed justification under each head;
- Availability of land for the proposed project, as also, details of access/right of way to the site;
- Requirement and availability of raw materials and intermediate inputs as well as utilities like water, electricity etc.;
- Requirement and availability of skilled and unskilled manpower;
- Commitment from various Ministries of the host country for implementation of the project, such as tax exoneration, allotment of land, environmental clearances, security to Indian personnel, clearance of goods from Customs Clearance Offices and its transportation to the site;
- The DPR would need to evaluate the technical and financial sustainability plan of the proposed project, the developmental benefits arising from the project and the capability of the host Government to ensure smooth handling of the project post implementation;
- Environment impact assessment (EIA) and resettlement of populace (if necessary);
- EIA must be done by a Maldivian Consultant approved by Environmental Protection Agency (EPA) of Maldives;
- Availability of the major project components from Indian entities, along with the names of established and reputed Indian suppliers conforming to the requirement of 75% Indian Content;
- Financial and technical feasibility of the proposed project;
- Benefits to the country of domicile and the locality of the project;
- Any other specific requirements suggested by the Borrower during tendering stage;
- Consultant to complete the detailed requirement by conducting site specific surveys;
- Consultant to assess access to the islands for material/equipment transport;
- Any other comments or suggestions.

II) Description of Scope for Project Management Consultant (PMC) services

The services of the PMC shall broadly include but not limited to the following:

- Tender Engineering, including Preparation of Technical Specifications, Tender documents;
- Assistance in Tender evaluation and recommendation of award of Engineering Procurement and Construction (EPC) contract;
- Technical assistance in finalization of Bill of Quantities (BOQ);

- Review of designs;
- Synchronization of shipments from India by EPC contractor in tandem with physical progress and site preparedness.
- Inspection of materials at manufacturer's works before dispatch to site;
- Supervision of civil works, and monitoring of implementation of the project;
- Certification of work progress and invoices including the requirement of 75% Indian Content in each contract;
- Weekly/monthly/quarterly progress reports during the implementation of the project
- Evaluation of operations and maintenance;
- Post-commissioning stages of a project;
- Any other specific requirements specified by the Borrower in tender documents.

C] Contract execution period

The assignment for preparation of the Detailed Project Report (DPR) will be completed within a period of three (3) months. The PMC services will commence with preparation of tender documents until the end of the Defects Liability Period (DLP). The total duration of the Contract i.e. for preparation of the DPR and PMC services is expected to be 43 months.

D] Implementation Plan

The Implementing Agency (IA) will be the Ministry of National Planning and Infrastructure (MNPI), Government of Maldives. The overall project management will be undertaken by MNPI through an established Project Management Team. The project will be implemented in consultation with authorities such as Environment Protection Agency (EPA), Atolls and Island Councils, Ministry of Environment, Ministry of Economic Development, Ministry of Finance, and other necessary authorities relevant to the project. The project islands are packaged for implementation and monitoring purposes based on the geographical distribution so as to allow for better logistical access via regional airports for the transportation of materials and labor as well as ease of access for staff movement from the capital. Details of packages are as follows:
