### **A] Background and Major Components of the Project**

#### **Site and other Data**

With a population of around 24.3 million in 2017, Cote d'Ivoire has about sixty ethnic groups and nearly seventy languages. Located in West Africa Cote d'Ivoire is bordered by Ghana to the east, Guinea and Liberia to the west, Burkina Faso and Mali to the north and the Atlantic Ocean to the south. Cote d'Ivoire is a relatively decentralized state. The country divided into 14 administrative districts, of which two are cities organized as autonomous districts (Abidjan and Yamoussoukro). The 12 non-autonomous districts are subdivided into 31 second-level "regions". The autonomous districts and the regions are divided into 108 third-level "departments". The departments are divided into 510 fourth-level "sub-prefectures". Sub-prefectures contain "villages" and, in some instances, several villages are combined into fifth-level communes. There are 197 communes.

Côte d'Ivoire (CIV) is a lower-middle income country (LMIC) with a Gross National Income (GNI) per capita of US\$1,520 in 2016 and is the second largest economy in West Africa. After 10 years of economic stagnation accompanying civil unrest, economic growth picked up and GDP has increased at more than 7% annually. Since 2012, the country ranks among the top ten countries with the highest growth rate in the world (averaging 9.4% over the period 2012-2015). At 1%, inflation has been lower than the regional average and a series of structural reforms aimed at supporting business activity, accompanied by infrastructure investments to redress the impact of civil conflict, have helped to stimulate economic growth. The macroeconomic outlook remains positive, with IMF predicting growth at similar rates until 2020, with continued low inflation.

The health system in Côte d'Ivoire is organized according to the administrative divide. At village level, there are primary care service (Centre de santé rural/CSR), it's the first population health contact managed by the nurses or wise women. Most of these centers are difficult to access due to bad roads. At the Sub-prefectures and communes, there are secondary primary care service (Centre de santé urbain/CSU) with a medical doctor. At the department level, there are reference hospitals (Hopital Général/HG) with urgent, medical consultation, obstetrical, operation, basic radio diagnostic services. The regional level is linked with the Regional Hospital (Centre Hospitalier Régional/CHR). At the top, there are tertiary level with the Universities and Research Hospitals called Centre Hospitalier Universitaire /CHU). The current public health system in Côte d'Ivoire contains around 2000 primary health care centres; 112 general hospitals; 23 Regional Hospitals and 5 University Hospitals.

Weak infrastructure and unavailability of drugs and medical equipment are important challenges, especially for maternal and child health. 45% of primary and secondary health facilities are without electricity; 35% without water; and 32% without both water and electricity.

### Project background

The objective of the Project is to rehabilitate and equip 117 health facilities in Côte d'Ivoire. It is intended to equip 80 health centres and 8 general hospitals, and to rehabilitate and equip 29 health centres. It is also planned to build the capacity of maintenance services in health facilities. The overall objective of the project is to improve the use and quality of health services with an emphasis on maternal, new-born and child health.
