Part I: Scope of EPC

The Export-Import Bank of India (Exim Bank or the Bank), on behalf of the Government of India (GOI) has approved financing of a project out of a Line of Credit extended to the Government of the Republic of Sierra Leone for financing Transmission line and Substation. A part of the LOC shall be utilized for PMC service for 225 kV (Double circuit), 66 kV (Multi circuit/Double circuit, 33 kV (Single circuit) Transmission Lines and Associated Substations in Sierra Leone, for which Exim Bank now seeks applications for prequalification from eligible Indian entities. Refer Part II ITA 4 for eligibility provisions.

A] Background and Major Components of the Project

Sierra Leone is located on the west coast of Africa, between the 7th and 10th parallels north of the equator. Sierra Leone is bordered by Guinea to the north and northeast, Liberia to the south and southeast, and the Atlantic Ocean to the west. Its population is over 7.4 million. It is the oldest African country and has a spectacular coastline. The total geographical area of country is about 71,740 sq.km. The climate of the country is tropical, hot & humid. Winters are dry, typically hot during the day time and cool to cold in the night. Summers are usually wet and cloudy. The lowest and highest altitudes are zero meters respectively at sea level and about 1,948 m at Loma Mansa (Bintumani). The natural resources found in the Sierra Leone are a rich mix of diamonds, rutile, bauxite, gold, iron, and limonite. About 39 % of the country's land is covered with the forests. The general topography of land is of an undulating type comprising mainly of uplands and low lands.

The members of Economic Community of West African States (ECOWAS) had established a new organization West African Power Pool (WAPP) in January 2006. Currently, a sub-regional 225kV 1303 km transmission project under WAPP, also known as Transco CLSG (Cote d'Ivoire–Liberia – Sierra Leone and Guinea) is under development with a view to provide electrical energy at competitive and affordable prices in the West Africa region so as to ensure the desired socio-economic development. The WAPP line is passing through eastern part of the Sierra Leone. Ministry of Energy (MOE) intends to develop a transmission link and evacuate the power from WAPP substations in eastern Sierra Leone to the capital region Freetown in western Sierra Leone.

The project is divided into two Packages i.e. Transmission Line (Package-I) and Substation (Package-II). The details are as follows:

Package –I : Transmission Line -

- A. 225 kV Double Circuit Transmission Lines from proposed Bumbuna WAPP/CLSG Substation to Switchyard of Bumbuna Extension Hydro Electric Power (HEP) (Proposed), (approximately 4 km).

and
225 kV Double Circuit Transmission Lines from Yiben HEP switchyard (switchyard to

- be constructed by HEP developer) to Yiben MOE substation (approximately 4 km)
- C. 66kV Multi Circuit Transmission Line (approximately 3.5 km) from Waterloo substation passing through densely populated area in Waterloo and bifurcates further as under:
- 66kV Double Circuit Transmission towards Sussex (approx. 39.5 km)
 - 66kV Double Circuit Transmission towards Hastings (approx. 5.5 km)
- D. 33kV Single Circuit Sub-Transmission Line from new Hastings substation to existing Wellington substation. (approx. 11 km)

Packages

This common Application Document for Pre-qualification is applicable for the above two packages distinctly. The Applicant may apply through a single Application for either or both the packages and clearly indicate the Package(s) applied for in the Application Submission form. Subsequent to pre-qualification, the Borrower may undertake bidding for the two packages separately.

B] Contract execution period

The duration of the contract, for each Package, is expected to be thirty (30) months excluding the defect liability period of twelve (12) months.

C] Other Information

The significant objective of the WAPP is to establish a regional electricity market in West Africa through an appropriate development and implementation of key infrastructures so that all ECOWAS member states are given access to economic energy resources. The four countries i.e. Cote d'Ivoire, Liberia, Sierra Leone and Guinea have duly signed and ratified an International Treaty establishing a Regional Transmission Company (RTC) known as TRANSCO CLSG with a clear mandate to finance, construct, own, operate and further develop the CLSG transmission interconnection line. One of the objectives of the CLSG Grid is to facilitate the trading of stable and reliable electricity in an effective and efficient manner thereby creating value for the key players in the electricity supply value chain; reducing the cost and increasing

the supply and reliability of electricity for buyers. With interconnection within the CLSG Grid, the envisaged network will be moving towards achieving that objective inter alia fulfilling the domestic requirement.

D] GOI Guidelines

As per the GOI guidelines, goods, works and services for minimum 75% value of the contracts covered under these Lines of Credit, must be sourced from India. Applicants are advised to refer to the GOI guidelines mentioned above which are also available at <https://www.eximbankindia.in/assets/pdf/loc/GOI-Guidelines-on-LOC.pdf>
