Part I: Scope of EPC

The Export-Import Bank of India (Exim Bank or the Bank), on behalf of the Government of India (GOI) has approved financing of a project out of a Line of Credit extended to the ECOWAS Bank for Investment and Development (EBID), Togo for the project for extension and upgradation of potable water supply networks in the three capital cities namely, Maradi, Dosso and Diffa regions in the Republic of Niger, for which Exim Bank now seeks applications for prequalification from eligible Indian entities. Refer to Part II ITA 4 for eligibility requirements.

A] Background

Niger is a landlocked country in West Africa named after the Niger River. Niger is bordered by Libya to the northeast, Chad to the east, Nigeria to the south, Benin and Burkina Faso to the southwest, Mali to the west, and Algeria to the northwest. Niger covers a land area of almost 1,270,000 km², making it the largest country in West Africa. Over 80% of its land area lies in the Sahara Desert. The capital and largest city is Niamey, located in Niger's southwest corner.

Niger is a developing country, which ranks last in the United Nations' Human Development Index (HDI) in the 2018 and 2019 report. The economy is concentrated around subsistence agriculture, with some export agriculture in the more fertile south, and export of raw materials, especially uranium ore. Niger faces serious challenges to development due to its landlocked position, desert terrain, inefficient agriculture, high fertility rates without birth control and resulting overpopulation, the poor educational level and poverty of its people, lack of infrastructure, poor healthcare, and environmental degradation.

B] Project Description

The project consists of supply of equipment for the production, delivery and distribution, storage, social connections and standpipes and the rehabilitation of the existing network. The infrastructure to be built will serve the three (3) regional capitals out of the eight (8) in Niger, namely: Maradi, Dosso and Diffa.

The project will contribute to ensuring universal access to drinking water at an affordable cost in urban areas by improving the coverage of the drinking water needs of the populations of Maradi, Dosso and Diffa and their living environment.

This objective will be achieved through the following specific objectives:

- Increasing the production capacity through the search for new catchment areas and the construction of boreholes,
- increasing storage capacity by building new reservoirs, and

- improving the service through extension, densification, and construction of new social connections (individual connections and standpipes).

B.1. Technical Description of the Project

Potable Water Supply Network:

The water supply network is as follows: The water from drilled boreholes is pumped through cast iron pressure pipes to a storage facility (a reinforced concrete reservoir). The production of potable water goes through a disinfection treatment using Sodium Hypochlorite followed by the use of lime to regulate the pH value in order to obtain water of acceptable quality.

From the reservoir, the water is distributed under gravity to the supply points which are individual domestic water connections and standpipes by means of a PVC distribution system.

The water pumping devices are the submerged electric pumps. Two sources of energy have been adopted: the generator and the electric energy distribution system.

Major Works and Network Equipment:

The potable water supply network (AEP) is as follows: (i) water catchment facilities: boreholes; (ii) water pumping equipment (pumping): submerged electric pumps powered by the NIGELEC electric energy system and/or thermal generation (generators); (iii) water treatment equipment (disinfection): chlorine dosing pumps; (iv) storage facilities: tarpaulins, overhead water tanks and (v) distribution systems: piping network, standpipes, connections.

Location of the Project

Maradi

The regional capital of the Maradi region, is located in the centre south of Niger, between parallels 13° and 15° 26' north latitude and meridians 6° 16' and 8° 36' longitude. It has a surface area of 41,796 km² and is bordered by the Zinder region to the east, Tahoua to the west and Agadez to the north, and shares a border of about 150 km with the Federal Republic of Nigeria to the south.

The economy is based on trade, agriculture, notably groundnuts, of which it was a centre of excellence, beans, millet and the breeding of cows, camels and small ruminants. There are factories such as Sonitan tannery, Olga Oil, Niger Plastique, Enipriom mattresses, Migas metal construction, and the Tarna potters.

The droughts of the 2010s and the threat of the Islamist group Boko Haram have led to a considerable growth in the number of inhabitants.

The drinking water facility serving the city of Maradi comprises 14 boreholes in two groups and a treatment plant, with a current production (in 2018) of 17,278 m³/d for a requirement of 64,000 m³/d by 2035.

Dosso

The capital of the Dosso region, is located in the southern part of Niger, between northern latitudes 11°50 and 14°40 and eastern longitudes 2°30 and 4°40. It covers an area of 33,844 km² and is bordered to the east by the Tahoua region, to the northwest by the Tillaberi region, and to the south by the Republic of Benin.

The main economic activities of the Dosso region are based on agriculture, livestock, trade, crafts and the exploitation of forest resources. The agricultural production system in Dosso is essentially extensive and highly dependent on climatic hazards, as in all regions of Niger.

The drinking water equipment serving the town of Dosso includes 9 deep boreholes, 2 of which are out of service, and a treatment plant. Current production (in 2018) is 6,753 m³/d for a requirement of 14,000 m³/d by 2035.

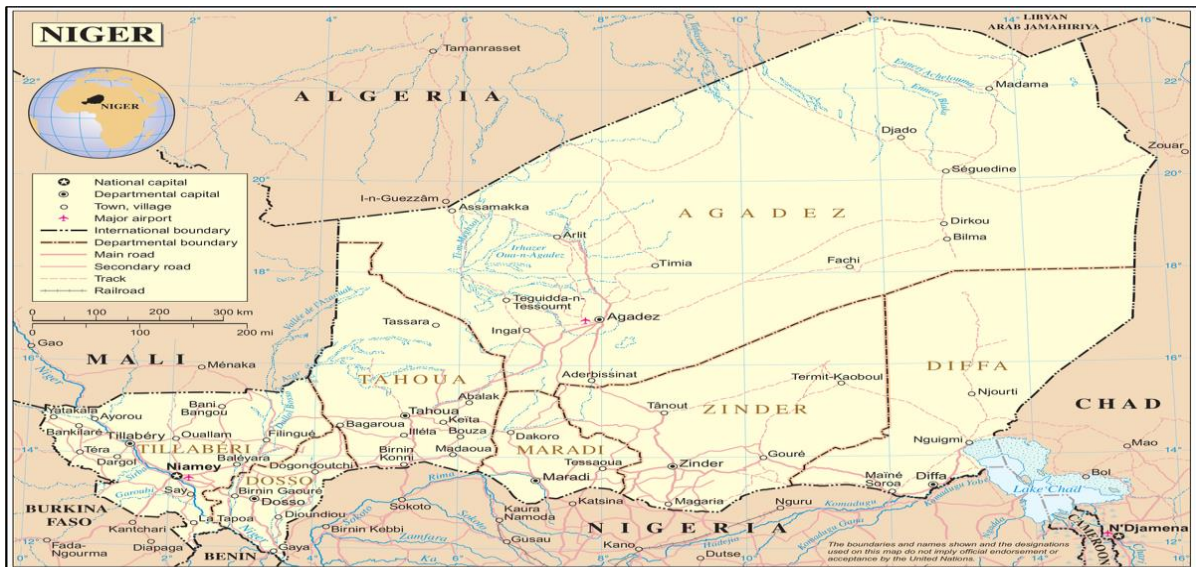

Diffa

The capital of the Diffa region, is located in the extreme east of Niger and lies between 10°30' and 5°35' East longitude and 13°04' and 18°00' North latitude. It is bordered to the North by the Agadez region, to the South by the Federal Republic of Nigeria, to the East by the Republic of Chad and to the West by the Zinder region. It covers an area of 156,906 km².

The regional economy is essentially based on agro-sylvo-pastoral production. In the field of agriculture, millet monoculture remains the predominant activity of the population. Three quarters of the cultivable land is devoted to this activity, i.e. nearly 105,000 ha out of the 299,500 ha of arable land. What's more, with seed varieties that do not require much water.

The drinking water equipment serving the city of Diffa consists of 12 deep boreholes dating from 1984 or more, 3 of which are severely damaged and out of service, and a treatment plant. Current production (in 2018) is 3,536 m³/d for a need of 7,000 m³/d by 2035.

Map of Niger

B.2. Scope of EPC:

The project covers the towns of Maradi, Dosso and Diffa with an extension (15 to 20 km) in areas where drinking water distribution facilities do not yet exist. The scope of works will consist of the following:

- Construction and supply of equipment of 15 boreholes in Diffa (average depth = 700 m), 45 boreholes in Maradi (average depth = 200 m) and 25 boreholes in Dosso (average depth = 150 m);
- Construction of three (3) recovery stations;
- Construction of two (2) 2000 m³ reinforced concrete water towers in Maradi, one (1) 1500 m³ reinforced concrete tank in Dosso and one (1) 2000 m³ reinforced concrete tank in Diffa;
- Extension and densification of the distribution network over 100 km (50 km at Maradi, 30 km at Dosso and 20 km at Diffa);
- Supply and installation of 130 km of DN 400 mm cast iron supply pipes (60 km in Maradi, 35 km in Dosso and 35 km in Diffa);
- Construction of 21 km of MV power lines (9 km at Maradi, 5 km at Dosso and 7 km at Diffa) to supply the well fields;
- Establishment of a remote management system for each center;
- Construction of fence walls for boreholes and well fields;
- Installation of 13,000 social connections (10,000 in Maradi, 1,600 in Dosso and 1,400 in Diffa) and 410 standpipes (200 in Maradi, 110 in Dosso and 100 in Diffa) in the various districts of these towns with the layers disadvantaged;
- Rehabilitation of the existing network (10% of the existing one) over 60.9 km (34.3 km at Maradi, 16.9 km at Dosso and 9.7 km at Diffa);
- Improvement of the physico-chemical quality of distributed water.

C] Contract execution period

The expected duration of the project is eighteen (18) months followed by defects liability period of twelve (12) months.

D] Project Authority

Water Heritage Company of Niger (SPEN) is the Project Authority.

E] GOI Guidelines

As per the GOI guidelines, goods, works and services for minimum 75% value of the contracts covered under the Lines of Credit, must be sourced from India. Applicants are advised to refer to the GOI guidelines mentioned above which are also available at <https://www.eximbankindia.in/assets/pdf/loc/GOI-Guidelines-on-LOC.pdf>.
