## **Part I: Scope of EPC**

The Export-Import Bank of India (hereafter, Exim Bank or the Bank), on behalf of the Government of India (GOI) has approved financing of a project out of a Line of Credit extended to the Government of the Republic of Maldives for Establishment of the Felivaru Fisheries Complex Expansion Project, for which Exim Bank now seeks applications for prequalification from eligible Indian entities. Refer Part II ITA 4 for eligibility provisions.

### **A] Background and Major Components of the Project**

The fisheries sector is a key driver of the Maldivian economy and an important source of earning foreign exchange. The industry contributes to the development in outer atolls and is essential in creating employment and livelihood opportunities. The key categories of fish exports include fresh or chilled tuna, canned tuna and frozen tuna.

The Maldives Fisheries Corporation was formed in 1982 as a state-owned enterprise. After many stages of development in the fisheries industry, it may be said to be the origin of today's Maldives Industrial Fisheries Company Limited [MIFCO]. The company was incorporated in 1993; but has been involved in the procurement of fish caught in the Maldives for processing even before the incorporation of MIFCO itself. Presently, the company manages nationwide fish collection and processing and canning for local and international markets. MIFCO operates EU accredited factories for canning, processing of chilled, frozen and value-added fish products. MIFCO exports tuna, tuna products, reef fish and other fishery products mainly to international and regional markets. Fresh yellowfin tuna is mainly exported to Europe and USA.

MIFCO has 3 processing facilities; Felivaru Fisheries Complex (FFC), Kooddoo Fisheries Complex and Kan'duoyigiri Fish Village. An additional facility in Addu City has gone into operation recently, purchasing fresh tuna from local fisherman and storing mainly as a support facility for other operations of MIFCO. MIFCO also maintains several ice-plants across the country to enhance the efficiency of the value chain. In the domestic market, MIFCO Masfihaara sells different products for the local market produced at the above factories under MIFCO's own brand name "Fasmeeru".

The Government of Maldives views MIFCO as an integral partner of the economic agenda due to the strong linkage to the fisheries sector and its role of employment and livelihood generation and also as an important source of foreign exchange.

#### **Objectives: -**

MIFCO has faced many challenges in the past decade. The company collects over 60% of the Skipjack tuna caught by the fishermen usually at a premium above the floor price set by the Ministry of Fisheries, Marine Resources and Agriculture. The main market for MIFCO historically has been the frozen tuna market of Thailand and MIFCO was able to sell frozen

tuna at a premium price in Thai market for pole and line caught Skipjack tuna in the past. However, the premium offered from the Thai market has deteriorated over the past 5 years as more tuna fisheries have been certified by the Marine Stewardship Council as eco-friendly fisheries. One of the main impediments to expanding the scale of fish processing and value addition is the difficulties in fish collection. Hence, the margins from exporting frozen tuna have diminished and the business of exporting frozen raw materials is now an inefficient and costly process.

Therefore, reviewing the current operations of MIFCO, the Government of the Republic of Maldives (GO-MDV) has proposed to make strategic investments for an increase in cold storage capacity and to improve present infrastructure at Felivaru Fisheries Complex (FFC). The Felivaru project would also invest in expanding the processing facilities at FFC by construction of a new cannery and processing facility and a fishmeal plant to its present processing activities. An ice making plant would be established in Gaafu Alifu (GA) Gemanafushi to improve the supply of ice to fishing vessels in the Southern region of Maldives. The proposed increases in storage and processing capacities and the investment in ice plant will be fully in line with the government policy to improve value-addition and additional sources of income in the country thereby contributing to greater profitability of the companies.

FFC, is the main cannery in the country. Originally opened in 1977, then as a joint venture between the Government of Maldives and a Japanese Company. The FFC cannery has the capacity to process 50 Metric Tons, along with other key infrastructure facilities such as 15 Metric Tons tuna pouch production plant, cold storage 750 Metric Tons and freezing capacity of 30 Metric Tons/day.

Gemanafushi is one of the islands in the Gaafu Alifu atoll, which is an administrative division of the Maldives. Also known as Northern Huvadhu Atoll or Huvadhu Atholhu Uthuruburi, Gaafu Alifu was created on 1962 when Huvadhu Atoll was divided into two districts. Gaafu Alifu corresponds to the northeastern section of this large natural atoll north of the line extending between the channels of Footukandu and Vaarulu Kandu. The capital of this district is Vilingili.

The proposed upgrade of infrastructure in the FFC center and the establishment of an ice-plant in the GA Gemanafushi primarily focuses on increasing the storage capacity and improve infrastructure, thereby achieving greater operational efficiency at much lower costs. The objectives of the project include;

- a. Accessing new markets,
- b. Increasing fish collection and storage capacity,
- c. Increasing efficiency of collection operations,
- d. Upgrading ice-plants,
- e. Creating greater value-addition and additional sources of income,
- f. Increasing cold storage capacity,

- g. Upgrading in the infrastructure of MIFCO

## **C] Other Information**

### **General details about site location**

#### **i) Temperature and Rainfall**

The temperature of the Maldivian atolls does not vary much throughout the year due to its proximity to the equator. From the available data, it was observed that the period between March to June recorded the highest temperature, April being the hottest month. The period between July to September was also observed to record temperatures slightly lesser than the hottest months. The lowest temperatures were recorded between September to December.

#### **ii) Rainfall**

The rainfall pattern in the Maldives is largely governed by the Indian Ocean monsoons. The South West monsoon lasts from May to October and the north-east monsoon occurs from December to February. From the rainfall statistics recorded at S.Gan, it is observed that the annual mean rainfall is higher during South West Monsoon (in the month of October) and lower during North East Monsoon (in the month of February).

#### **iii) Waves**

Based on the available data it is observed that locally generated wind waves with shorter wave periods (4 – 8 seconds) approach the atoll from South East and North East Directions whereas swell waves generated from the Indian Ocean, with longer period ranging from 10 – 24 seconds, approach from South Southwest. The significant wave heights generally range from 0.5 to 3.5m.

#### **iv) Nearest Airport**

‘Velana International Airport’ is located adjacent to Male with regular flights from throughout Asia, the Middle East and Europe.

#### **v) Port**

The principal port in the Maldives is located at Male. Felivaru has a small deepwater berth used for export of canned tuna.
